

ACTION ITEMS / DISCUSSION CALENDAR

OPERATING PRINCIPLES OF THE BOARD (NORMS)

Every board should have operation principles and certain “norms” that are accepted practices and behavior that each director and member should follow as a representative of the Board.

IMPLEMENTATION AND PROCESS NORMS

- We are committed to practice these norms, whereupon we evaluate and adjust as the Board deems necessary.
- Upon the occasion of the occurrence of what appears to be a breach of these norms, we are committed to addressing this perception first to the individual(s) involved, before raising the issue with the Board itself. The Executive Director would be the individual to address the perception and if there is no Executive Director, the President would address the issue. For all TEAM RCD business, as discussed in this document and otherwise, if the President is unavailable during the time necessary to respond or otherwise undertake the actions in question, the responsibility will go to the successive elected Officers, in order of seniority of position, Vice President and then the Secretary/Treasurer. If the occurrence becomes necessary to discuss at Board level, it will be the Board that takes the appropriate action to remedy the breach.
- All Communication should be accurate and brief. Communication must be funneled to the Office Manager with a copy to the Executive Director. If there is no Executive Director, the Board President should be copied. E-mail communication that is meant for informational or information gathering purposes for Directors prior to any meeting will be sent through the office manager who will ensure the inability of Directors to “reply all”.
- Information gathering for Director assigned project areas is encouraged, however, should be in the Directors’ area assigned to them and may need to be authorized by the Board with parameters as to the project scope and representation from the Board to that effect.
- Basic information gathering and reporting to the Board generally would not include larger meetings with multiple organizations, larger governmental and sister agencies and/or groups. These type of requests from Directors should follow a chain of command in order to keep the Executive Director and/or the President aware of Board Director activities and to enable them to anticipate agenda items that may need addressing. Following is the chain of command to follow:
 1. All requests for larger meetings should be brought to the Executive Director and/or President and office manager to decide the necessity of the larger meeting.
 2. The President or other assigned Board officer (if the President is not available) will review the existing request and be given the authority to collect all the necessary information. This should include the purpose of the call, the nexus as to the included individuals, an agenda, specific scope of discussion detailing the process and potential goals to be achieved, current information collected, and the needs or interest of existing partners

and how this call would be of benefit our partners, those on the call and/or the community.

3. At this time, the Executive Director and/or President will be given the authority by the Board to determine if there is still more information needed before reaching out to groups or other governmental agencies prior to moving forward. If so, it will be given back to the Director to do more research.
4. Once sufficient information has been gathered, the outreach to Executive Directors of outside organizations, groups, or governmental agencies as potential partners on larger calls will be done by the Executive Director and/or the President to decide if there is interest on the part of the participants to be part of a call or if the call is of benefit to both organizations. This will help determine whether a larger call is necessary or if more data needs to be collected to host a larger call. It has been the norm of the board to be respectful of sister agencies, their staff and their time as well as TEAM RCD's time.
5. If those calls show minimal or no interest in the District's project, no call will be scheduled, however the President and/or appropriate designated officer of the Board, will give a report on the results of the outreach at the next meeting and give the Board opportunity to discuss options. The Board can or may agendaize either to move forward to finding alternatives to getting the project done and/or abandon the project, as decided by the Board.
6. If sufficient information has been gathered that warrants further discussions with several partners or advancement based on interest, the item will be agendaized and discussed at the next available meeting as to the potential for advancing discussions with those partners and what the Board hopes to achieve.
7. If the Board votes to host a meeting, an agenda will be established in advance and brought to the Board for a vote. All meetings will have agendas in order to keep the meeting and focus on track.
8. All virtual or in person meetings that affect or have anything to do with TEAM RCD that are initiated by any Director should go through the office manager and be arranged through the TEAM RCD offices and technology for arrangements to be made for the physical location or virtual platform.
9. The President and the office manager will make all arrangements and send out to the interested parties an invitation with a concrete agenda and discussion points which have been approved by the Board. This process also includes notifying all Board members, if interested in attending that they must make clear to the office manager that they will be attending. If three or more members wish to attend then the meeting may be required to be noticed to the public to make sure the Board is in keeping with state rules and regulations.
10. Once the call or meeting commences, the President or designated TEAM RCD representative will give an overview of the reason for the meeting and what they hope can be achieved. At which time, should an individual Director be the point person in their assigned area of the discussion, the President will do a formal introduction of the Director and ask them to give their presentation and answer questions.
11. Board members are encouraged to seek out all kinds of information particularly if it pertains to their specific area of assignment from the Board. There are also many

informational and training videos available through our member associations CSDA and CARCD which are free. Executive Directors, or in the absence of one, elected officers of the board in order of authority (President, Vice-President, Secretary-Treasurer) historically have been given more authority to speak on behalf of the Board due to the nature of their elected position to speak on behalf of the Board. The President has the authority to speak for the Board as its representative as the elected head of the Board and in the absence of the President in order of position, the Vice President and then the Secretary would be afforded those duties and authority to maintain the normal order of business if the President is not available. Individual Directors shall have no power to act on behalf or speak for TEAM RCD or the Board or to direct the staff of TEAM RCD unless specifically authorized by the Board.

12. If there is any question as to the extent of an individual Director authority or lack of written policy does not specify exact direction to act on specific subjects, it is advised that the Director contact either the President, Vice President or Secretary/Treasurer (Senior officers in order of board hierarchy) prior to doing anything if they are unsure of or unclear on the chain of command in achieving a specific goal. Board members must be conscious that there may be additional information that they are personally unaware of that may impact the District or the Board itself should they decide to act unilaterally. Clarification can also be obtained through District Counsel.

- The Executive Director and the President are in charge of putting together the Agenda and working with the Office Manager to put all the appropriate materials together for the Board Packet. In the absence of the President, these duties fall to the elected officers in order of rank. Should specific information miss the packet deadline but will be discussed at the meeting, hand-outs will be available to the Board and the public at that time.
- The agenda is based on the current work plan, speakers, Directors projects, ongoing projects and available time. The President is given the authority by the Board to create the agenda as the President deems necessary and sees fit in order to run an efficient meeting within accepted norms for the board. As a rule, the meetings last roughly 1 hour or more however they do not usually last more than one and half hours unless they are for specific required training sessions for Directors which as a rule are a minimum of 2 hours. All speakers are given a relative time frame for presentation. However, speakers who request to present to the Board that are current collaborators or are working on current projects will normally take priority over a new speaker since they may have current project information that the Board may need to act upon quickly. These organizations are given deference in the time they are given and therefore a speaker or presentation will affect the timeline of the agenda.
- If someone would like to speak at a meeting, they should contact the Board President directly through the office manager to discuss the purpose and subject to be discussed. The President and the speaker will discuss how the subject will benefit TEAM RCD's mission statement and the District and a decision will be made as to the viability of the subject and if a presentation is necessary. Members of the public can also speak during public comment for up to 3 minutes.
- TEAM RCD is a quasi-governmental non-political body and strives to maintain partnerships and collaborations with those organizations whose goals coincide or enhance TEAM RCD's mission statement and in doing so, help and enhance the District and the community in a non-partisan

way. The Board is clear that it has no interest in putting the District in the middle between opposing sides of conservation, habitat or political issues, locally, regionally or nationally. TEAM RCD does not feel it productive to take either side of controversial issues and prefers to be more collaborative with their sister agencies, its partners and the community. Since governmental agencies both County and State have more enforcement authority than Resource Conservation Districts, TEAM RCD can provide support with their resources once issues or discussions are decided at the higher levels of government if the Board decides to act. The District's focus is to use their resources to achieve common sense and reasonable conservation goals that gives everyone involved a piece of the pie and strive for a win-win situation for all sides in the District, not to divide it by taking particular sides.

AUTHORITY OF THE BOARD

- The Board of Directors shall act only at regular, regularly adjourned or special meetings as provided by State Law.
- Individual Directors shall have no power to act for TEAM RCD, or the Board, or to direct the staff of TEAM RCD except as authorized by the Board.
- The Board is authorized to delegate any of its powers and duties to "an officer of TEAM RCD". This is usually the Executive Director or the President. The TEAM RCD Board has delegated day-to-day responsibility of the administrating and delegation of general District business to the President, to be summarized and discussed at the next Board meeting in the form of an agenda. In the absence of the President, due to illness or unforeseen issues, the authority passes first to the Vice-President and then to the Secretary-Treasurer to act in the role of President. The Board, however, retains ultimate responsibility over the performance of those powers or duties so delegated.
- The Board sets the policy for the TEAM RCD. When there is no Executive Director, the authority lies with the President of the Board, who is elected once a year for a one-year term in June. Should the President not be available, authority passes to the Executive Officers, the Vice-President and then the Secretary Treasurer. The Board provides policy direction to the Chief Executive and/or the President on matters within the authority given to them by majority vote of the Board members present during duly-convened Board meetings.

Hi folks,

My name is Teri Biancardi and I am a recently appointed director at TEAMRCD. The board selected me to be the Anza/Aguanga representative and part of my job is to screen upcoming grants to see if they could be applicable to projects in our region.

One of the grants that I think has a lot of potential is the CDFW Cannabis Restoration Grant, [here](#). What is particularly interesting about it is the wide net it appears to cast.. offering funding for improvements in communities affected by cannabis grows. In other words, not just creek clean-ups, which are, of course, very high value. But possibly this grant could fit a wide range of projects, including gathering baseline information on our watersheds.

I'm at the very beginning of this process, looking for potential projects and partners, and I'm reaching out to you now to see if you might have any interest in having a call to bat around ideas. If so, please let me know before the end of the week with some possible times you could be available early next week.

In case you're wondering, the directors at TEAM are aware of my intention to contact you. I look forward to hearing from you!

Best,

Teri

Hi Teri,

Rose has asked me to forward the following from my email in order to avoid having a serial meeting - Deb

Teri,

Thank you for recently joining our Board and expressing interest in working on behalf of it for the community. However, since you are so new, there are a few procedural matters about the way TEAM RCD works that you may not be aware of yet. First, Deb Getty sets up all our zoom calls and those generate from our source which is our office manager only. It would be best to cancel this call for now until we can make the arrangements ourselves and have a plan as to what the discussion is going to include. Although you said you wanted to put a call together during the meeting, when the Board discussed it, I told you that we would need to talk about this to narrow the focus of what was discussed before we scheduled the call.

Secondly, I am concerned that your comments seem to make it appear that the Board has assigned you the position of screening grants for the entire District instead of just the Anza/Aguanga area. If you should want to toss around ideas without participation of the Board, it should be including only a discussion as to your area (Anza/Aguanga) and not necessarily including all these different organizations and or the entire TEAM RCD District that are the responsibility of other Board members, except where you have been authorized from the Board to do so and that has not and was not agendized or voted on in the last meeting. This type of call is considered a larger call with more groups, one that I would put together and that the Board would make or that would I make as President once we see if we need partners or input with a specific agenda and items to discuss. I can understand the other RCD's but I believe it is a bit premature to be inviting the local universities or other organizations until we have a clear vision of what we want to do. We haven't decided that as a Board yet. It would be best if you could forward your ideas, as we asked all the members to do in the last meeting, to Deb first until we can get our arms around what might be feasible. I am concerned that you might give the wrong impression to our partners that you have been given authority to be screening all of our grants and holding meetings on behalf of the Board which don't include other members of our Board.

I appreciate your enthusiasm and interest, but I feel we're putting the cart before the horse and so, for now, Deb will be reaching out to Mr. Mason and the included recipients on the e-mail chain to cancel this zoom meeting so we may have time to discuss then re-schedule. We will discuss what we as a Board want to accomplish and how best to meet those goals at the next Board meeting. For that reason, I'm having Deb bcc the other members of the Board so everyone understands the background when we discuss it on May 13.

Hi Teri,

Please find below a response from Rose - Deb

Teri,

Thank you for your response in regards to my e-mail. In an effort to avoid multiple e-mails going back and forth, we will be placing this procedure as an action item to include all correspondence and recommended guidelines on the next Board agenda so that the entire Board can participate in this discussion and make decisions about procedures and chain of command going forward to avoid any further misunderstandings. At that point processes and resolutions can be discussed and potentially voted on should the Board decide to do so.

In the meantime, I want to address your concern that a copy to our District Counsel should be misconstrued as a threat because as you say "County Counsel" was copied. You admit in your note that you still do not know your way around and perhaps this would include processes regarding keeping our own District Counsel informed. Ms. Cushman is our **District** Counsel, although under the umbrella of County Counsel--she does not represent us as County Counsel. It is simply an automatic copy in order that we ensure that we are following the proper protocol and avoid violations of the Brown Act when corresponding with our Directors in this format. This is why our office manager sends these out in order to avoid anyone responding "reply all" and potentially creating an illegal serial meeting. This is exactly why all Zoom calls must originate from our office. Copying our District Counsel in these instances is our normal protocol as to not blindside our own District Counsel. Melissa is Counsel for the District, and any Board member can contact her with legal questions relating to the District. Her phone number is (951) 955-6522, and her email address is mcushman@rivco.org. I will have Melissa reach out if there is any misunderstanding as to her position with our Board to clarify any questions you may have.

Deb will be reaching out to cancel this zoom meeting with those on the e-mail chain until after the next Board meeting so we can go forward with clear cut policies for all members and re-schedule the meeting based on the agreed upon guidelines.

Regards,

Rose Corona

On 2021-04-13 19:11, Teri Biancardi wrote:

Hi Deb,

Please pass on my response to the rest of the Board members.

Rose,

I am sorry that you think that I have over-reached in my effort to seek an opportunity to collaborate with other RCDs around the cannabis grant. That was never my intention.

However, I cannot see how my query to the other RCDs could be construed as anything other than what it was, merely a fact-finding mission. I state clearly in my email that I would like to discuss the CDFW cannabis grant, nothing more. I state that I am the Anza/Aguanga rep, not that I am representing the entire TEAMRCD board. Nowhere do I suggest that I am assuming the role of screening all grants for the District.

I recognize that I am new but I am not new to working on a board or the responsibilities of a director. I understand that the Board must speak as a unit, that one director cannot speak for the entire District, and that decisions must be voted on before action is taken. I do not remember reading in the policy handbook that directors are not allowed to participate in or arrange information gathering calls, and I have not received any training to that effect. I did state in the meeting that I intended to reach out to the other RCDs, as was given no instruction to the contrary. You are absolutely correct, I am enthusiastic about my new position, and so I am keen to learn all I can about the needs of our region and possible opportunities to collaborate with our sister RCDs.

I appeal to you not to request that Roy Mason, in his role as President of the San Jacinto RCD, cancel the call he arranged. Yes, he works at MSJC but there is no university connection here. I think that would send the wrong message, that we are disorganized. This is just a friendly chat, that anyone from TEAM is welcome to join, to explore possible collaborations around just this one grant.

I understand TEAM has its own culture, and that I do not yet know my way around. I do find it threatening that County Counsel is copied on this email, as though there may be legal repercussions for my outreach. I do believe I have been transparent and forthcoming in my efforts, and the records will show precisely that. Finally, I am sorry that you are disappointed in my actions. I have only the best interests of our District and the natural resources of our region in my heart.

Best,

Teri

Hello All,

Although I appreciate the recent communication from Deborah Gray this meeting was not scheduled by her. It is my meeting and I AM NOT CANCELLING. I have invited other RCD board members and staff to a discussion of this grant opportunity and the meeting will be held as scheduled. There is a very short timeline to apply for these funds. Many of us will not have regularly scheduled meetings prior to the grant deadlines but it may be in some of our best interests to prepare ahead of time to submit proposals.

Please feel free to join in if you have an interest in reviewing this grant RFP.

Roy Mason is inviting you to a scheduled Zoom meeting.

Topic: Earth Day Zoom

Time: Apr 22, 2021 01:00 PM Pacific Time (US and Canada)

Dear Partners,

We will be cancelling the April 22nd Zoom meeting until after our May Board meeting so that the Directors may have further discussions regarding the grant programs and processes at which time we will be re-scheduling at a later date.

Kindest Regards,

Deborah Getty

Thank you Rose,

We have also agendized the item for our regular meeting this evening. We agendized today's earlier special meeting to see if there might be any interest from other districts and to explore possible cooperation and coordination of proposals. Please feel free to contact me in the future if you would like to discuss the item further.

Roy

>>

>> Hi folks,

>>

>> My name is Teri Biancardi and I am a recently appointed director at TEAMRCD. The board selected me to be the Anza/Aguanga representative and part of my job is to screen upcoming grants to see if they could be applicable to projects in our region.

>>

>> One of the grants that I think has a lot of potential is the CDFW Cannabis Restoration Grant, here [5]. What is particularly interesting about it is the wide net it appears to cast.. offering funding for improvements in communities affected by cannabis grows. In other words, not just creek clean-ups, which are, of course, very high value. But possibly this grant could fit a wide range of projects, including gathering baseline information on our watersheds.

>>

>> I'm at the very beginning of this process, looking for potential projects and partners, and I'm reaching out to you now to see if you might have any interest in having a call to bat around ideas. If so, please let me know before the end of the week with some possible times you could be available early next week.

>>

>> In case you're wondering, the directors at TEAM are aware of my intention to contact you. I look forward to hearing from you!

Subject: Potential grant collaboration opportunity?

Date: April 13, 2021 at 11:38:09 AM PDT

To: Shelli Lamb <lamb@rcrcd.org>, Diana Ruiz <ruiz@rcrcd.org>, rmason@msjc.edu, Bmills.SJBRCd@verizon.net, mparkes@iercd.org

Hi folks,

My name is Teri Biancardi and I am a recently appointed director at TEAMRCD. The board selected me to be the Anza/Aguanga representative and part of my job is to screen upcoming grants to see if they could be applicable to projects in our region.

One of the grants that I think has a lot of potential is the CDFW Cannabis Restoration Grant, [here](#). What is particularly interesting about it is the wide net it appears to cast.. offering funding for improvements in communities affected by cannabis grows. In other words, not just creek clean-ups, which are, of course, very high value. But possibly this grant could fit a wide range of projects, including gathering baseline information on our watersheds.

I'm at the very beginning of this process, looking for potential projects and partners, and I'm reaching out to you now to see if you might have any interest in having a call to bat around ideas. If so, please let me know before the end of the week with some possible times you could be available early next week.

In case you're wondering, the directors at TEAM are aware of my intention to contact you. I look forward to hearing from you!

Best,

|| Teri

Annual Work Plan Submittals

- Erosion control and sedimentation management conservation.
- Help to restore clean water to those in Anza
- Promote the NRCS mulching program to dovetail with promotion of the Crop Swap and Root Stock Swap programs and post on website in same area and collaborate with NRCS to provide information for those interested citizens in our District.
- Research and collaborate with Mission RCD on Agri-Ecology program in order to potential start a pilot program for TEAM RCD and our Distri
- Work with Chris Gray of WRCOG to identify grant opportunities that if awarded to us would provide funding enabling us to start building a permanent staff. Not sure if initial staff person would be a project manager, a public outreach/relations person, a community education person, or an administrative person who can function full-time to help us build further capability within the RCD. Obviously the type of individual will depend on the type of grant we pursue, but we should aim at grant opportunities that provide sufficient funding to cover an initial hire or two.
- Continue annual work plan with no changes.
- If we must add to our workload, I believe we should expand our collaboration with the homeless task force in Lake Elsinore to help with a removal process. We should also look for groups that can help with restoration of these areas after the homeless are removed.
- Establish a subcommittee that can review grants and green-light further work at short notice.
- Encourage and support SAWA in screening for and preparing grant applications for regional projects that would include TEAMRCD.
